

# Friday, April 19: Budtender Day!

*4/20 is just a day away!*

With a potential increase in marijuana sales, CCD would like to remind those working directly with customers to be mindful of some information from the worker permit training.

## **No sales to underage or those without valid identification:**

While medical cards have photos on them, you should check the person's identification to confirm the information as well.

## **Check daily and monthly limits of medical card:**

When selling to medical cardholders, check their daily and monthly limits to confirm you don't over sell to them.

## **Do not exceed purchasing limits:**

One ounce of usable marijuana may be sold to either an adult-use customer or a medical cardholder (if their card limit allows) at a time.

## **Don't forget the exit bag:**

All marijuana and marijuana products must be placed in a child-resistant exit package at the point of sale.

*Scan QR for more information on worker permit training.*
